Particle Board & Engineered Wood Liability Release Form

Dear Customer:

Please take a moment and read the following important information regarding the transportation of non-solid wood furniture:

Furniture manufactured from pressboard, particleboard and/or engineered wood are designed to go into a box from the manufacturer, to the retailer, and then to the customer unassembled. It is **NOT** built to withstand the normal stress of a move as an assembled unit, like regular wood furniture. Most of the furniture is not built/ designed with the proper wood/metal structure to brace the unit/piece for movement in and out of a residence or storage place.

This furniture is not built to withstand the normal truck vibration, even when air-ride suspension is in use. Usually chips or dents are not repairable. Surface impressions can be made on this type of furniture simply by writing on a single sheet of paper. Assembly instructions sometimes suggest that the hardware pieces be glued together, and/or locked into place. This **DOES NOT** improve the structural integrity of the piece, but does make disassembly impossible, without creating substantial damage, usually beyond repair.

Due to this we are requesting that you sign this release form.

I, the shipper, am tendering furniture constructed from pressboard, particleboard, and/or engineered wood furniture as a part of my move. I understand that any claim for damage to pressboard, particleboard, and or engineered wood furniture will be denied due to the inherent susceptibility to damage, as outlined above.
